

iGrafx Receives U.S. Army Certificate of Networthiness

Certification clears iGrafx Process for Six Sigma for deployment throughout the US Army's IT infrastructure

Tualatin, OR. — May 18, 2010 — iGrafx®, a leading provider of Business Process Analysis (BPA) solutions, announced today that its iGrafx Process for Six Sigma solution, received the Certificate of Networthiness (CoN) from the U.S. Army Network Enterprise Technology Command (NETCOM). The CoN is a requirement for all enterprise software products that operate in the Army Enterprise Infrastructure network.

The Certificate of Networthiness earned by iGrafx requires compliance with rigorous standards established by the United States Army and involves in-depth testing against validated guidelines.

It verifies that iGrafx Process for Six Sigma has met the Army's highest standards for security, compatibility, and sustainability. In addition to the U.S. Army, the CoN applies to all Army Reserve, National Guard, and Department of Defense organizations on the Army Enterprise Infrastructure network.

"The Army Certificate of Networthiness is recognized as a benchmark for security, compatibility, and sustainability validation," said Ken Carraher, President iGrafx, " iGrafx's receipt of the Army CoN is essential to our Department of Defense clients and private sector customers and provides further evidence of the quality of our products and validation to our federal government customers that iGrafx meets the rigors of government use."

The U.S. Army, as well as other government and private industry organizations, uses iGrafx solutions to model, improve, and manage processes in support of process improvement, compliance, and risk management initiatives.
